DETAILED ACTION

Claims 1-5 have been cancelled and claims 6-10 have been added by preliminary amendment filed 23 December 2005. Therefore claims 6-10 are currently pending in this application.

Information Disclosure Statement

Applicant's Information Disclosure Statements, filed 23 December 2005 and 15 June 2006 have been considered. Please refer to Applicant's copies of the 1449 submitted herewith.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1626

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 6-10 are provisionally rejected under the judicially created doctrine of provisional obviousness-type double patenting as being unpatentable over claims 5-8 of US 2006178421 A1 (U.S. Application Serial No. 10/562,490). Claims 6-10 of the present application teach a process

of preparing perindopril of Formula

by reacting compounds of Formula

with compounds of Formula

. In claim 9, X1 and X2 are

defined as each representing chlorine, imidazolyl or trichloromethoxy. Claims 6-10 of

US2006178421 teach a process of preparing perindopril by reacting compounds of Formula

with compounds of Formula

wherein R1 represents

imidazolyl, benzimidazolyl or tetrazolyl. Although the conflicting claims are not identical, they are not patentably distinct from each other because both application teach process of preparing perindopril using the same or similar starting materials. One skilled in the art would have been

Art Unit: 1626

motivated to make perindopril using the process described in this application by choosing imidazolyl or chlorine for X1 and X2 substituents salts when faced with US2006178421.
